2024 Targets

At Onerahi School the aspiration is to have 95% of our tamariki achieving within or beyond their expected curriculum level. The school works on improving outcomes for students through many and varied programmes, learning opportunities and teacher development and the expectation is that from year to year our tamariki grow and achieve success in their areas of strength. The focus on achievement in the basic learning areas of Literacy and Communication and Mathematics are a priority, both explicitly taught and embedded into a context of real life learning.

From year to year, the target is for students to progress in a school year by 10%.

Special programmes that accelerate learning are provided for those students who may not meet this target.
